ADVERTENCIA - WARNING

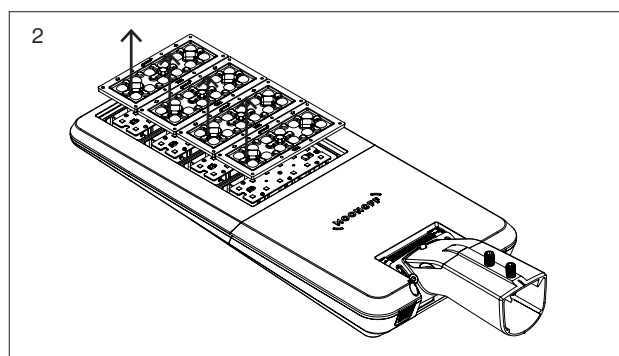

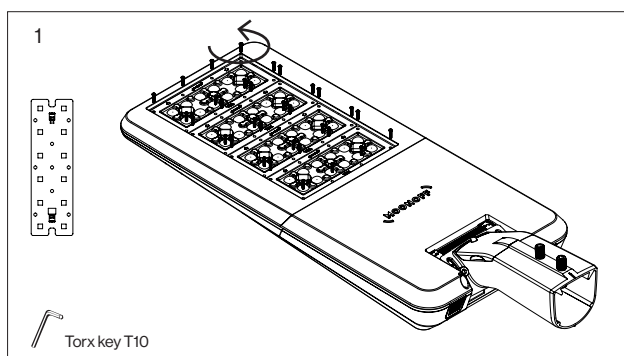

⚠ Para el mantenimiento de este producto se debe cortar el suministro eléctrico y realizar la medición para confirmar que no existe tensión de alimentación. Una vez verificada la ausencia de voltaje, se procede a realizar el reemplazo del componente deseado según las siguientes instrucciones que apliquen en cada caso.

⚠ For the maintenance of this product, the power supply must be cut off and the measurement is performed to confirm that there is no supply voltage. Once the absence of voltage has been verified, the replacement of the desired component is performed according to the following instructions that apply in each case.

LENTE - LENS

USO Y MANTENIMIENTO - USE AND MAINTENANCE

- Este producto contiene una fuente luminosa de la clase de eficiencia energética C. (@máx. carga 4000 K 70 CRI)
- La fuente de luz es atenuable por el driver suministrado con el producto continente mediante los protocolos de 0 – 10 V, PWM, Clock Dimming, Dali, Dali2.
- Para mantener un correcto funcionamiento de la luminaria se recomienda una limpieza periódica de la lente utilizando un jabón / detergente con PH neutro con un paño suave.
- La fuente de luz y el sistema de control independiente debe reemplazarse únicamente por el fabricante, su servicio técnico o persona cualificada equivalente. Precaución, riesgo de choque eléctrico. ⚠
- Se debe cortar el suministro eléctrico en caso de mantenimiento o manipulación para su instalación.
- Las luminarias están diseñadas para un alumbrado exterior y no debe ser usada en ambientes erosivos inflamables o explosivos.
- No usar las luminarias a un voltaje diferente al especificado en la hoja técnica / etiqueta del producto.
- Al final de la vida útil de las fuentes de luz que se utilicen en los productos continentales de la marca Moonoff, el cliente se debe poner en contacto en la siguiente dirección: c/República Checa 23-25, P.E. Costa Vella 15707, Santiago de Compostela, España; para que la empresa Moonoff S.L. elimine sus fuentes luminosas según el contrato que tiene con una empresa que disponga de un Sistema Integrado de Gestión de Residuos (SIG) cumpliendo así con el Real Decreto 110/2015, de 20 de febrero, sobre residuos de aparatos eléctricos y electrónicos.

- This product contains a light source of energy efficiency class C. (@max. load 4000 K 70 CRI)
- The light source is dimmable by the driver supplied with the containing product according to the protocols of 0 – 10 V, PWM, Clock Dimming, Dali, Dali2.
- In order to maintain high efficiency may be needed cleaning of the outside of the lens twice a year using neutral PH soap / detergent with a soft cloth.
- The light source of this luminaire and the independent control system should only be replaced by the manufacturer, technical service or equivalent qualified person. Caution, risk of electric shock. ⚠
- The power supply must be switched off for maintenance or manipulation for installation.
- The lights are designed for outdoor lighting and should not be used in flammable or explosive erosive environments.
- Do not use the lights to a different voltage than the specified in the data sheet.
- At the end of the useful life of the light sources used in Moonoff branded products, the customer should contact the following address: c/República Checa 23-25, P.E. Costa Vella 15707, Santiago de Compostela, Spain; for the company Moonoff S.L. to eliminate its light sources according to its contract with a company that has an Integrated Waste Management System (SIG), complying with Royal Decree 110/2015, February 20, about electrical and electronic equipment waste.
